

AMENDMENT TO THE SPECIFICATION

Amend the paragraph beginning at page 16, line 1 to read as follows:

al Alternatively, an orientation device such as a magnetic compass can be incorporated into the mobile wireless communication device 20. This "low tech" variant nevertheless enables the user 10 to know which direction he is facing. Thus, the server 40 could tell the user to move "north," or "south" depending on the ~~users~~ user's 10 location.
